

SEANA RESTAURANT GROUP

To Whom It May Concern:

Seana Restaurant Group owns and operates several Burger King and Denny's restaurant locations in Montana, Texas, and Arizona. Since our fixed monthly costs were high and there was no risk to undergo an SIB cost savings review, we decided to give them a shot.

SIB recently completed their review, and I was very impressed by the savings they achieved and the various ways they achieved them. SIB was able to find savings by negotiating better rates, correcting billing errors, optimizing service, cancelling unused services, discovering and removing fraudulent charges, and taking advantage of little-known discounts and promotions. It was truly a multi-pronged approach.

I consider my company to be frugal, but there's simply no way we could have devoted the resources to an internal review the way SIB could, with their staff and their expertise. The fact that SIB was willing to offer all this with no upfront costs was icing on the cake.

I consider our SIB review one of the best choices I've made in business. Others can rest assured that they will not be disappointed with an SIB review.
