

To Whom It May Concern:

Harsco Corporation recently enlisted SIB to review a variety of our vendor expenses and we were very happy with the value their team delivered.

SIB achieved savings for Harsco in a handful of areas including wireless phones, shipping, merchant processing, and bank fees. They conducted their review in a prompt, efficient manner and presented their recommendations with a great deal of specificity and clarity. We appreciated that SIB has industry experts in each field, and individual business units with decades of knowledge into the complexities within each service category. We have also engaged one of SIB's entities for a full suite of utility management services including energy procurement, invoice processing, data reporting, and more.

SIB was able to present their first findings in a matter of weeks, and overall their work will result in a significant six-figure reduction in annual expenditures. SIB provides a valuable service, and we are happy to offer our recommendation to other groups seeking to save money on operational costs.

Sincerely,
